## ... HUNTING IN THE HOLIDAY PARADISE?

Yes, but unfortunately only very few hunters know that. Spain, this popular holiday destination, has a lot to offer to us hunters. Monterias, excellent bird hunting, thrilling mountain hunts on four different subspecies of the Iberian ibex and: ... hunts on Cantabrian and Pyrenees chamois.

In Spain you can hunt two different subspecies of the chamois (*rupicara rupicara*). The Cantabrian chamois in the north of the country in the region of Asturias and the Pyrenees chamois in the northeast of the country (Huesca province).

Experienced chamois hunters rate the trophies of both species very high, because each year only a few licenses are issued. The populations are big in both distribution areas and the quality is very good, so that so far all our guests have come to the shot. The hunts are therefore only scheduled for two full days and that's usually enough.

Cantabrian chamois can be hunted in spring (15th of April to 15th of June) and in autumn (1st of September to 10th of December). The horns are generally not as strong as the horns of the Pyrenees chamois. But due to their limited habitat and the limited available licenses, this trophy is very popular. Good trophies - you can expect more than 90 points at the Pyrenees chamois, where the average is around 85 points. This subspecies may also be hunted in spring (20th of April to 15th of June) and in autumn (1st of September to 15th of December).

The rut falls in the months of November and December, but is not crucial for the hunting success. As with all mountain hunts, good equipment and footwear are beneficial. Although the mountain ranges of Spain are by far not as steep and difficult to access as the Alps, you should prepare yourself conscientiously.

# ... A GOOD PYRENEES CHAMOIS

**... IMPRESSIONS**

# WEAPON AND EQUIPMENT

In addition to personal fitness, the basic prerequisite for successful mountain hunts is also practical equipment, good clothing and a robust weapon with a high-performance caliber. Let us advise you in detail, we will gladly give you valuable tips and suggestions.

Take a sturdy repeating rifle with you for the chamois hunt. All of our standard calibres for hoofed game such as 7 x 64, .308 Winchester, .30-06, 7 mm Remington Magum or even 6.5 x 68 or 8 x 68 S are allowed in Spain. We recommend a rangefinder, a scope and lightweight binoculars with 10x magnification.

Normal shooting distances are between 150 m and 200 m. Because you usually shoot from a rest position, a quite fair distance. Many hunters now use a bipod on the weapon that any gunsmith can easily and inexpensively mount.

# OFFER & DETAILS

## OFFER • CHAMOIS HUNT

- 3 to 4 days of travel
- 2 hunting days
- 2 nights
- Full board without drinks
- All rides in the hunting area
